Zapier

App Overview

Integrate your Zapier automations
with KAZOO

Zapier

Overview

Zapier is a tool that allows you to connect apps you use every day to automate tasks and save time. You can connect any of their 1,500+ integrated apps together to make your own automation.

What's more, it's quick and easy to set up - you don't need to be a developer. Anyone can make a Zap! With Zapier your integrations are set up via Zaps which perform your automation for you. These automations are achieved by mixing a Trigger with Actions that are available on your favorite apps.

KAZOO now connects with Zapier, making it easier than ever to create automations for your business or your clients. The KAZOO app offers you an unprecedented 40+ Triggers and two Actions with more coming soon.

While Zapier is a paid service that's separate from KAZOO, the KAZOO "app" integrates the automations you create with KAZOO.
