

2600Hz STEP GUIDE – T-MOBILE

What is This?

This application enables you to support devices using the T-Mobile GSM-based network, using their SIM cards. This complements the Sprint's CDMA based network and provides suppliers with more handset and device options.

Before you start

- ✓ Check to make sure the T-Mobile device supports GSM and is carrier-unlocked.

Quick Steps

1. Identify devices you want to use with the T-Mobile solution.
2. Request a T-Mobile SIM card from your representative if your device does not have one already and install it into your unlocked device.
3. Enable the app from the App Exchange.
4. Choose a plan and activate the SIM card.

Activating a New SIM Card [Cancel]

1. Device Type
Select which type of device you want to use.

2. Plan Selection
3. ID + Location
4. Review + Confirm

Are you activating a mobile device or a data-only device?

Please designate which type of device you wish to activate. Your selection in this step will determine what remaining info is required to activate your new device.

Mobile Device
Activate a Smartphone, such as an iPhone or an Android device.

Data-Only Device
Activate a data-only device, such as a MIFI device or Internet Explorer device.

Activating a New SIM Card [Cancel]

1. Device Type
