workforce

CallThru.us

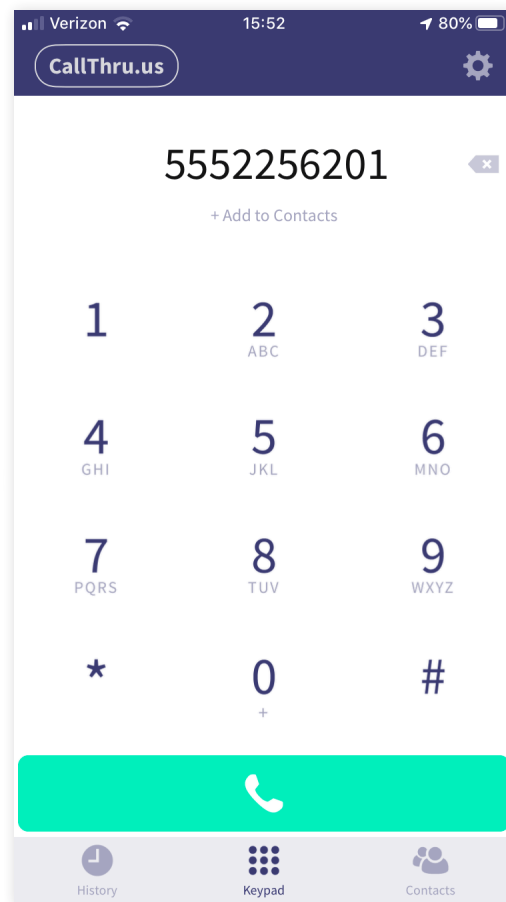

Overview

Callthru.us is a mobile softphone for iOS and Android devices that features the best call quality and clarity no matter where you are. Callthru.us routes calls through your office PBX and connects over a voice channel so you can always be heard and don't have to worry about dropped calls.

In addition, contacts can be imported into the app in a single touch making it easy to initiate calls and your call history is captured for quick re-dialing and number lookup. Simply download the iOS or Android Callthru.us app onto your mobile device to start making calls on the go.

With the Callthru.us app, you can:

- Make and receive calls on your mobile device through your office PBX
- Import your contacts for easy calling
- Find contacts alphabetically and via search
- View all your call history including all calls, missed calls and recorded calls
- See call history for inbound and outbound calls
- Save new phone numbers to your contacts

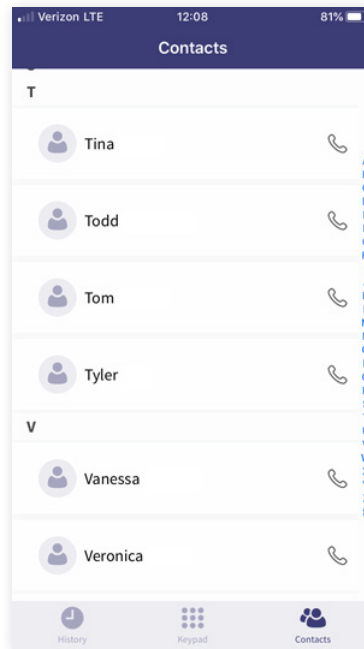

Highlights

CallThru.us

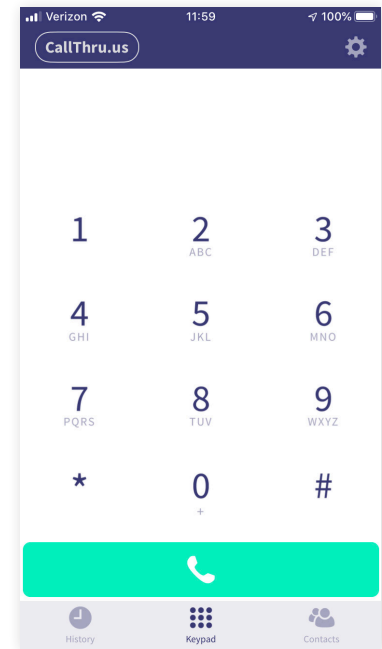

Call History

View your complete call history all on one screen and seamlessly tap between all calls, missed calls, and recorded calls. The search bar lets you easily find a specific call in your history, and the history includes all the details you need such as date, time and duration.

Contacts

Quickly import your contacts with a single click and create new contacts as needed straight from the softphone UI. Contacts are listed alphabetically and can be easily found using the search bar. Click on a contact to view all their information that was imported or manually saved.

Keypad

The Callthru.us app includes a full 10-digit keypad plus star and pound for easy dialing. Enter in a number and save it to your contacts, or add it to an existing contact.

CallThru.us
