User Portal download

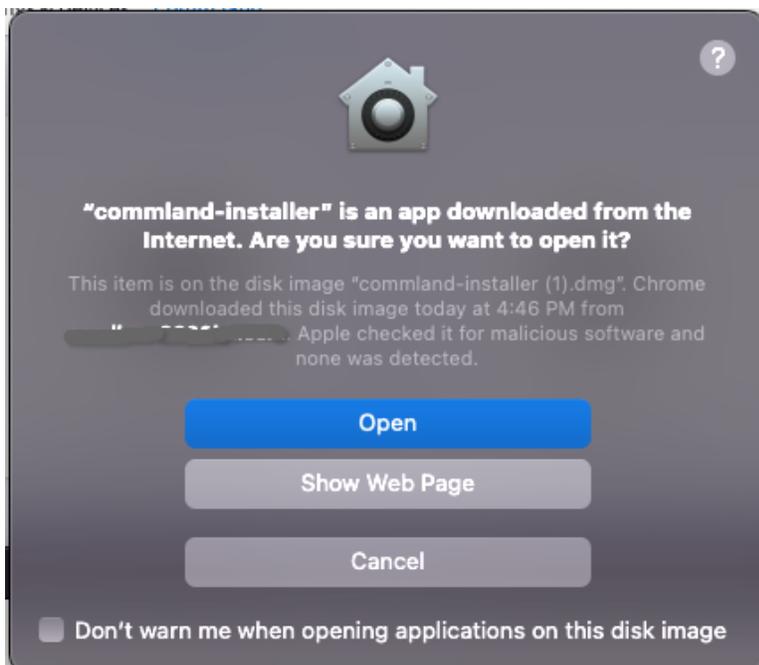

The user can simply login to the User Portal, and will have a new “Desktop” tab. When they select the tab, they will be presented the option to download for Windows or Mac.

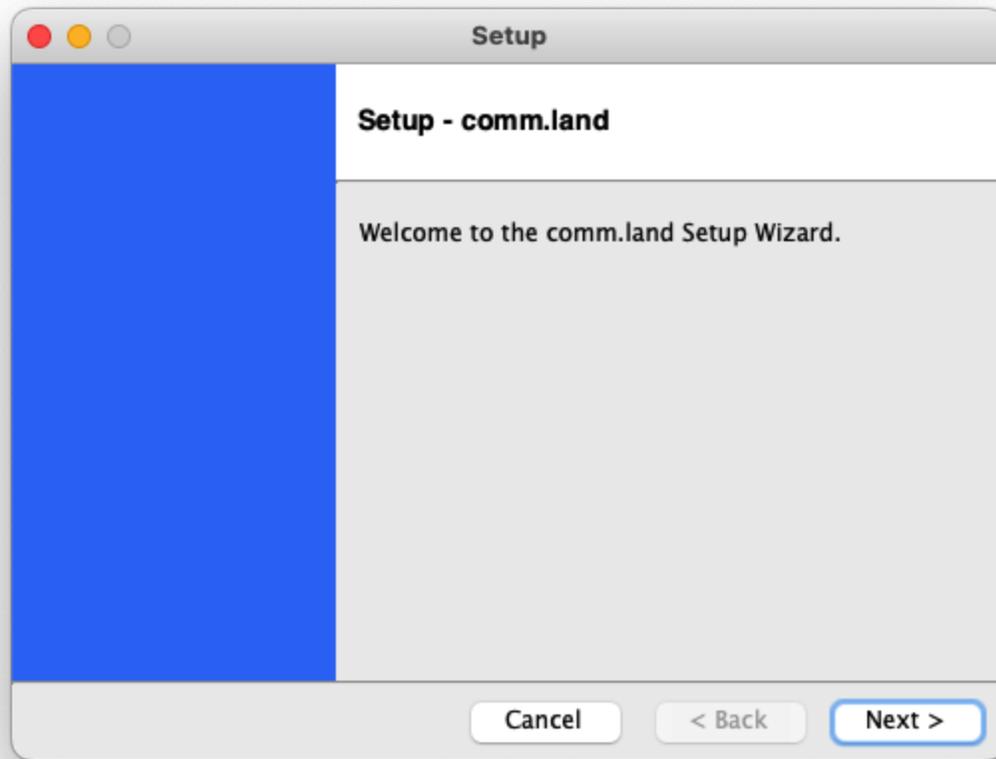

Mac

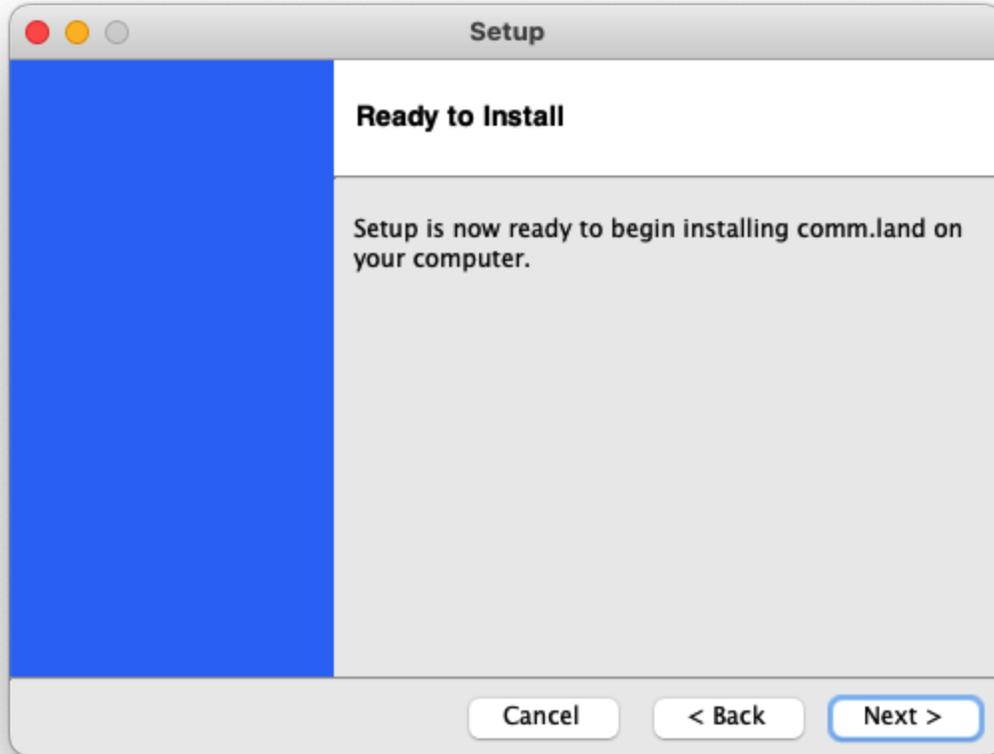

Upon download, open commland-installer.

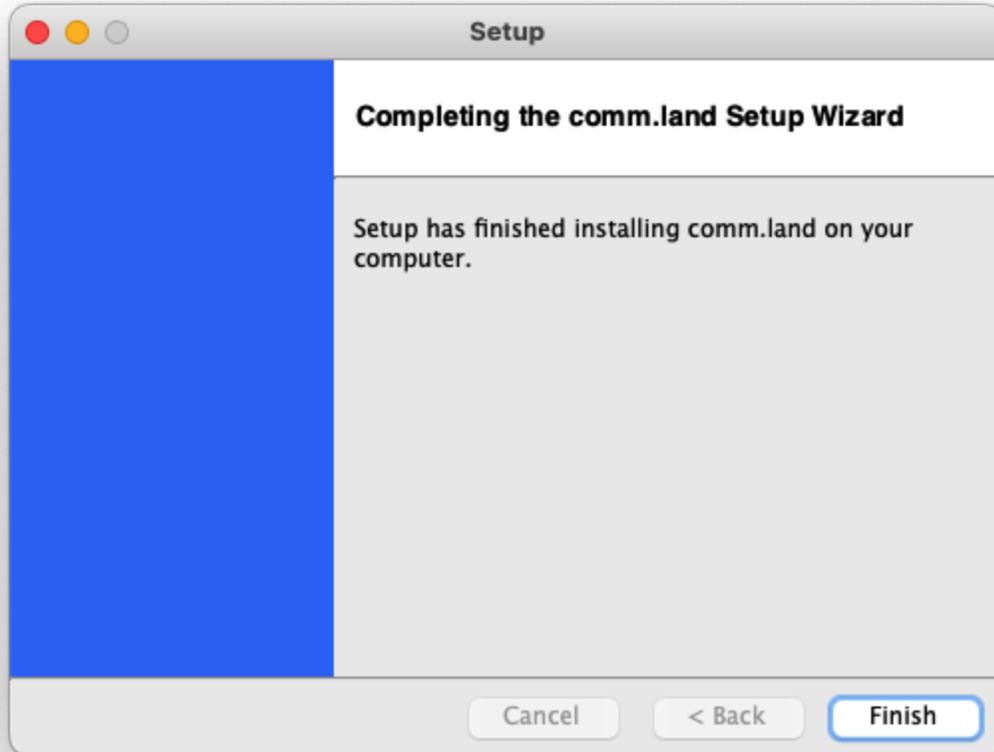

Select open.

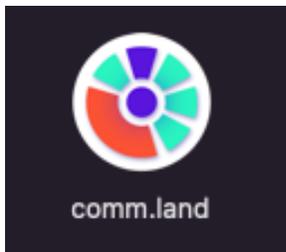

Then select next twice.

After installation select finish.

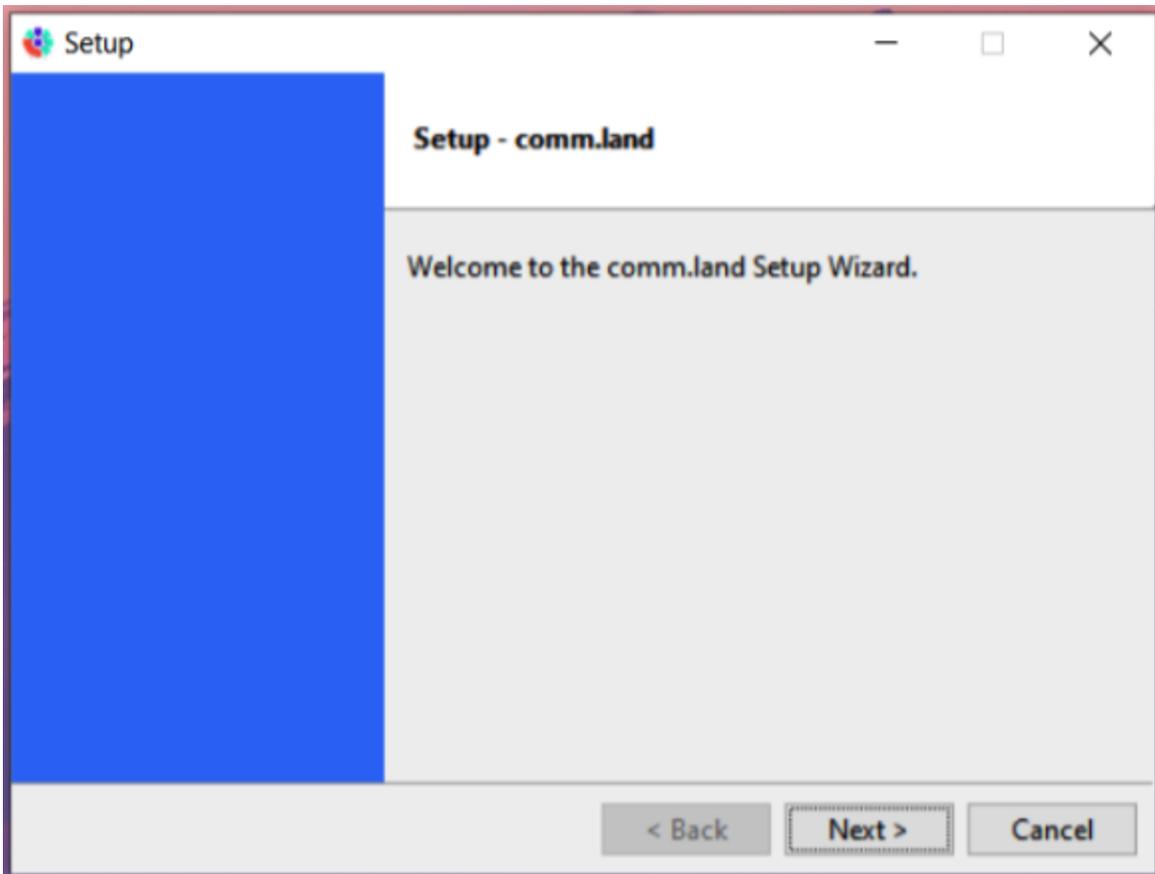

comm.land will be in your dock automatically.

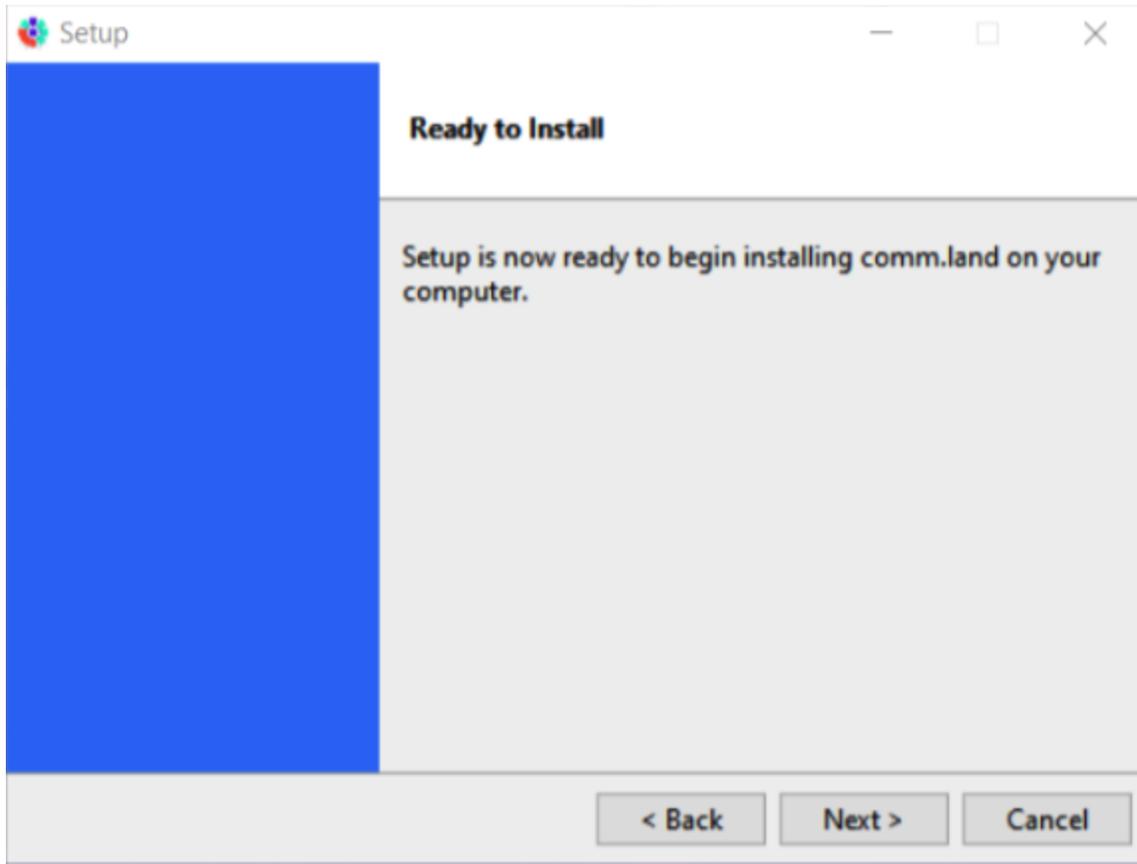

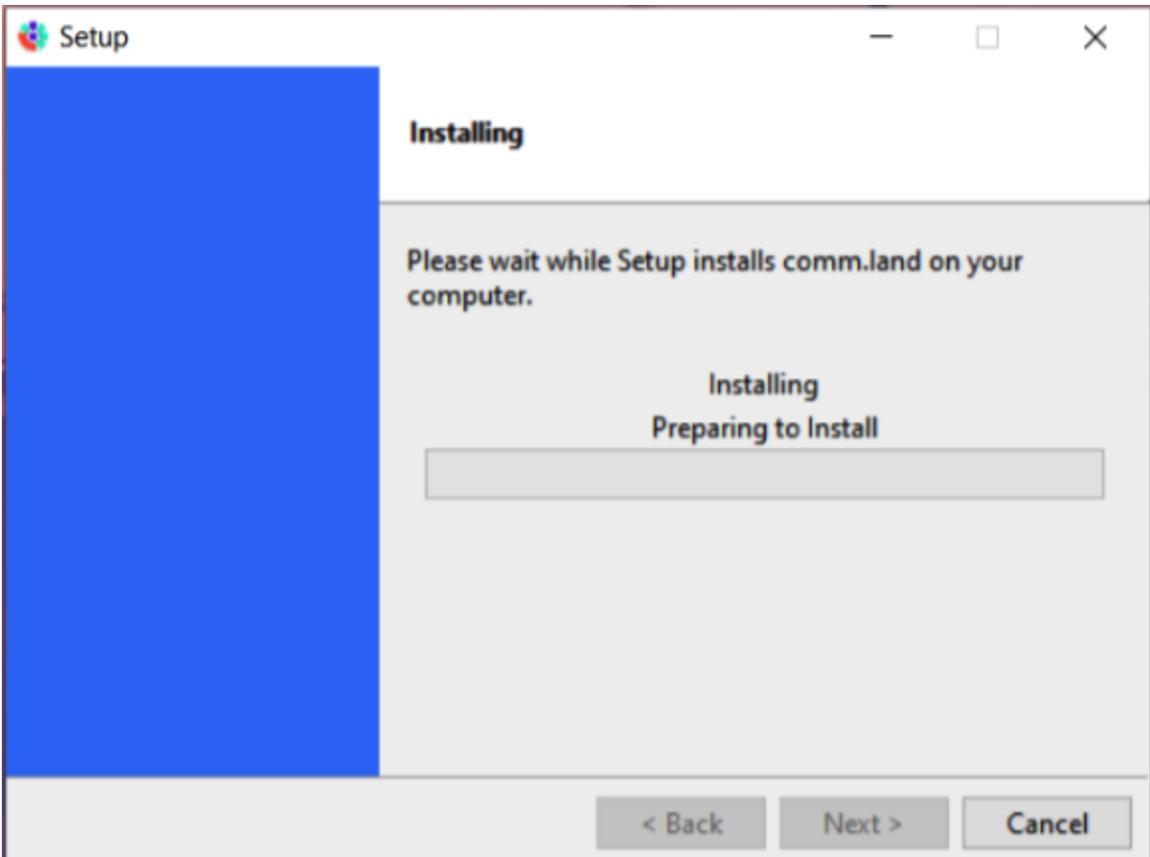

Windows

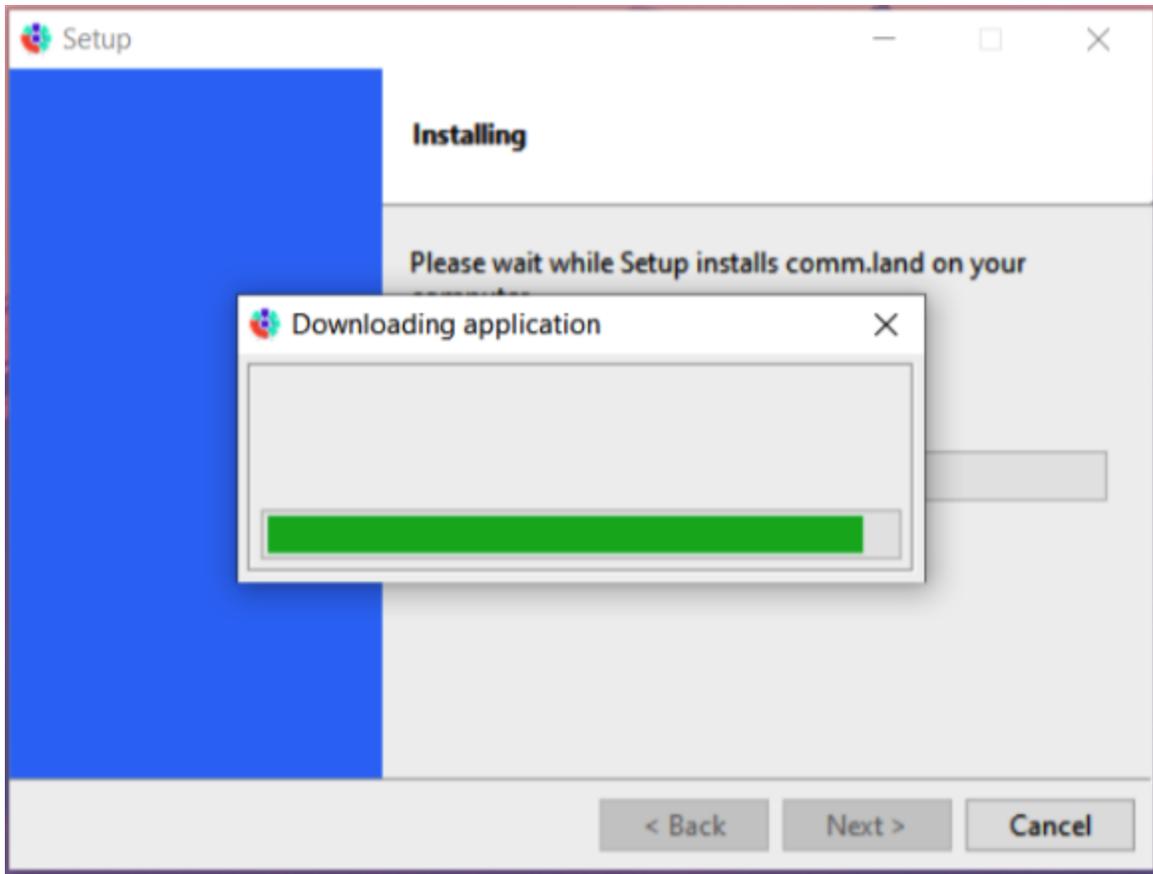

Open `comm.land.exe` file from download location. You will then see an install wizard.

Select Next.

Select finish when complete, comm.land will now be available on your PC.
